

## How to Clean Emily Morrow Home Hardwood Floors with OMG Proof Protection:

Our hardwood floors are designed to be easy to clean and require less effort to clean.

We recommend the use of NWFA Approved products such as Swiffer Wood Floor Cleaning solution or Bona Wood Floor Cleaner, as they both work very well. Other cleaning products oftentimes leave a residue which tend to attract more dirt.

Regularly clean the surface of the floors so that gravel or dirt does not accumulate.

When a pet tinkles, it is important to wipe it up as soon as you find it. Pets tend to go back to the same places, so having a well-trained pet is best.

Do not use steam cleaning or wet extraction systems to clean your floors. Doing so will void your warranty. To sterilize your floors, consider the recommended steps from NWFA [here](#).

Thank you!
